Role of philosophy and existence of man

Harish R

Abstract

Philosophy provides multi-dimensional knowledge and also existentialism it also relates with every field like education, culture, religion, etc. like this philosophy is also related with the existence of man it emphasis to words the man's nature and body with sensing and feeling aspects philosophy gives knowledge about man relationships to being or even man relationship with god gives knowledge about phenomena of man's life it is center of existence of man rather than truth, the philosophy comes to the aid of man by offering him so constituents principle such as athma - purusa - prakruthi but man living in the material world which are equivalent of humans souls but in the view of philosophy life is seen as gift which is part of mystery in the life of existence of man in the same way philosophy tries to give man's relationship to being or even man's relationships with god.

Keywords: existentialism, philosophy, athma - purusa - prakruthi, mystery, souls

Introduction

'Philosophy' as we know a love of wisdom. It provides multi-dimensional knowledge. There are various philosophies such as Naturalism, pragmatism, idealism, realism, humanism and also Existentialism.

Since we know that philosophy critically examines the assumptions, first principles and final conclusions of all knowledge. Philosophy in a more limited sense, as man's attempt to give meaning to his Existence through the continued search for a comprehensive and consistent answer to basic problems.

Philosophy related with every field. It relates with educational system, objectives of education, culture, religion etc., like these philosophy is also relate with existence of man.

Before we knowing the relationship between philosophy and existence of man we try to know about man, existence, and concept of existence of man.

Before we knowing the relationship between philosophy and existence of man we try to know about man, existence, and concept of existence of man.

Existence of Man

Man

Man a human being is composed of body and soul or mind. Mind is knowing aspect of man's nature and body is the sensing and feeling aspect of his nature many philosophies share a belief in the superiority of mind over body but both as its nature and governing action.

When we thought of man with respect to the above mentioned aspect some questions may be arised in our mind like what is an existence of man?

Whether this human existence relate with philosophy or not? For these questions existentialism philosophy will help us.

Human Existence

The meaning of human existence is that it is man's nature to exist to stand out into reality, "to participate in being, to the present to all that is".

Each one of us individually may be in the same boat as for as the nature of our existence is concerned. Important principles are Atmapurusa-parkrti but man, living in a material body, in a material world, which are both subject to the evolution of the prakrti principles and consequently to changes which are causes of suffering is not happy.

Existence is the time - space being empirically verifiable at least to the extent that it is. Its quality is secondary and at best derived.

Man cannot be an isolated subject or separate subject who can look at existence as a spectator and in his own subjective way nor is man an "Object" which is so completely integral to existence that he has no subjective view of his own. He is both the subject and object at the same time and also at the same tied to existence.

According to Danish philosopher, Soren Kierkegaard most common despair to be in despair at not choosing or willing to be oneself. But the deepest form of despair is to choose to be another than himself. 'Existence' as it is 'given' as it were, as the base of man's affairs. Phenomenological psychology was an exacting approach to the phenomenon of existence.

Relation between Philosophy and Existence of man

According to Jean PAUL SARTRE, a French philosopher and playwright, argued that human existence is ultimate, and that we must choose, by choosing, we become ourselves.

Philosophy comes to aid of man offering him Jnanam. According to philosophy, the centre of existence is man rather than truth, laws principles or essence. Man is characterized by decisions, will and choice.

Philosophy gives knowledge about man's relationship to being or even man's relationship with god gives knowledge about phenomenon of man is life as it is lived, and the mystery is an awareness of man's deep and complex meaning. The nation, 'the existence of man' is of uniqueness and mystery of man implies that previous definitions of man have been completely unsatisfactory.

Existentialism philosophy profound the belief that man cannot accept the ready-made concept of existence forced upon him. He is a free agent capable of shaping his own life and choosing his own destiny.

Philosophy comes to the aid of man by offering him some constituents principles such as Atma - Purusa - Prakrti but man living in a material world, material body which are both subject to the evolution of the prakrti principle and consequently to changes which are caves of suffering is not happy. Self-consciousness being considered as an aspect of purusa through prakrti, it is often called 'Purusa' so the Sankya Philosophy speaks of the evolution of the numerous purusas, which are the equivalent of human souls or individual self-consciousness.

Philosophy tries to give the meanings of the concepts "Being" Meaning "Existence" person, man to some extent. Philosophy viewed the human mind as it is and within the pattern of human thought speculated, however with much realism as to other ways of existing or other kinds of words which conceivably could have taken the place of the existence which actually is.

Existentialism philosophy more especially as a philosophy accompanied by speculations as to what effect it would have done education were its specific meaning in this field to be made explicit.

According to philosophy man is not alone in the world. He is connected to other man; he communicated with others therefore he cannot live in a state of anarchy. Life is seen as gift which, in part is a mystery. Man is free to choosing commitments in life. In his choices, he becomes himself. He is the product of his choices. He is therefore an individual who is different from other persons. The real living person is more important than any statement we can make about him. Man's is more important than his essence.

Conclusion

When i go through all the relevant information's pertaining to the existence of man and its relation with philosophy following conclusions made.

Philosophy is a branch of knowledge that comes to the aid of man by offering him constituent principles such as atma - purusa - prakrti.

Philosophy tries to give meanings of the term 'Existence' and 'man'.

Philosophy tries to give man's relationship to being or even man's relationship with god.

Philosophy comes to the aid of man offering him 'Jnanam'.

Philosophy accompanied by speculations as to what effect it would have done.

Philosophy profound the belief that man cannot accept the readymade concept of existence forced upon him.
